Falsification of information may result in termination of any scholarship granted. If declared a recipient of this scholarship, I will provide the Friends of Lake Keowee Society a statement that may be used for publicity purposes.

Applicant: ADDIE MEINTYRE

Date: 2/7/2022

Parent/Guardian: Randy Frady

Date: 2/7/2022

### H. Additional Information for Applicants

SC Adopt-A-Stream (SC AAS) provides the opportunity for those interested in the protection and improved management of South Carolina waterways to be directly involved in their monitoring and reporting. Volunteers provide vital data for streams that complements local and state data used to determine the health of our waterways. In sharing this information about stream conditions, volunteers, local communities, educators, and local government agencies can partner to protect and restore our waters. SC AAS trained volunteers have the potential to increase awareness within their own community of the relationship between pollution, watershed management, land use changes, and the personal responsibility of each individual within the watershed to be a better environmental steward.

The first step is to become a certified SC AAS volunteer by attending a FREE workshop! Volunteer trainings are available through Clemson University.

Click here to view upcoming training events.

<https://www.clemson.edu/public/water/watershed/scaas/aas-events.html>

As a SC AAS volunteer, you will be qualified to perform freshwater stream habitat assessment with physical/chemical, and bacteria monitoring (test shallow streams).

Volunteers will learn why the chemical and bacteria parameters are important to aquatic life, the significance of different levels, and how these levels can be affected. Trainers will lead the volunteers through field techniques and check techniques in collecting the sample and using the kits properly. Volunteers are encouraged to sample monthly and must attend a

To whom it may concern,

My name is Kaleb Hawkins and I am a Secondary Social Studies teacher at NEXT school Eagle Ridge. During my time at the school I have had multiple opportunities to observe the talents and skills of Mr. McIntyre. Jesse is a hard working and dedicated student who sets high standards for himself as well as meeting and often excelling above the standards of the school. Even outside of the classroom, it is very obvious that Jesse maintains successful relationships with his peers. These relationships give Jesse the opportunity to not just motivate himself, but also the people closest to him.

With that being said, I believe Jesse would make a wonderful candidate for this opportunity. He is a candidate that would understand the positive effect that this opportunity could have on him; and work diligently to make the most of it.

Best,

Kaleb Hawkins

February 8, 2022

Dear Mr. White:

I am writing to recommend Jesse McIntyre for the Friends of Lake Keowee Environmental Program Grant. Jesse is a young man who enjoys working outside, especially on automotive projects.

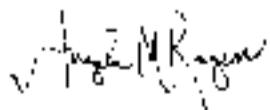

When I speak with Jesse about his life and goals, the person whom he always mentions as his greatest influence is his Papa. It is my understanding that Jesse's papa has taught him about a lot more than working on cars, trucks, and dirt bikes. He has also helped cultivate a love of the outdoors in his grandson.

When Jesse is passionate about something, he works very hard to learn as much as he can about it. I was delighted to learn that he is interested in this program and feel that were he award a grant, he would work hard to complete his project and learn all that he can learn as he works.

In addition to this, Jesse is one of the friendliest and most pleasant teenagers you might ever meet. He listens, he asks questions, and he is eager to hear what his teachers and mentors think. To me, this indicates he is ready for a project in which he could learn from mentors about the environment.

For these reasons, I feel this opportunity could be one that would help Jesse McIntyre grow and learn as he approaches the end of his high school career and prepares for adult life. I am happy to speak with you at your convenience to further discuss Jesse's qualifications.

Sincerely,  
Angela M. Rogers, Ph.D.

To whom it may concern.

Jesse is a great student. He is polite and works hard in class. I believe he would be a great candidate because of his dedication, charisma, and strong work ethic. Although he is not perfect, and struggles with punctuality, Jesse is kind and works hard at everything he does.

Thank you,  
Laura Grant
